

## Special Tours for Run for the Robots Teams

We are working with several local partners to offer optional tours designed specifically for Run for the Robots students. These experiences give teams the opportunity to see advanced manufacturing, engineering, and technology environments in the region.

Please note that tour registration will be available only to registered *Run for the Robots* teams and will be sent directly via email as opportunities open.

### **Toyota Motor Manufacturing Kentucky Tour**

Teams will have the opportunity to visit the Toyota manufacturing plant in Georgetown. These are the standard public tours, which include the visitor center museum and a guided look at the production process inside the facility. Students will see firsthand how modern manufacturing systems and robotics are used to build vehicles.

Tour registration will be shared with registered teams via email once sign-ups open.

### **BCTC Georgetown Campus Tour**

Located just a few minutes from the Toyota plant, the Bluegrass Community & Technical College Georgetown Campus offers an excellent look at advanced manufacturing education and workforce training. The campus features modern labs and equipment used to train students in robotics, automation, and industrial technologies.

Teams visiting Toyota are encouraged to stop by the BCTC campus immediately afterward, as it is located right around the corner.

Learn more about the campus here:
